

[/lommy pro]

Intelligent tracker and superior monitoring

Lommy Pro provides a complete overview of vehicles and machinery, securing precise and effective fleet management.

With a combination of GNSS & 4G CatM1 with 2G fallback technology, Lommy Pro makes it easy to maintain an overview and to monitor data coming from trucks, trailers, temperatures, and assets.

Lommy Pro gives you a high level of flexibility and functionality, even with low power consumption.

Lommy Pro is designed to serve many purposes, e.g., fleet management, temperature control, collecting tacho data and surveillance of door locking systems. Additional equipment can be used in combination with Lommy Pro – for even more application possibilities.

The device can be installed in any location where power supply is at hand. An internal backup battery ensures the data collection.

Driver insight

Gain insight into driving behavior to minimize fuel consumption and reduce wear and tear on trucks, brakes, and tires. Reduce the environmental footprint by optimizing driving behavior.

Tachograph

Plan and coordinate the driver's remaining driving time through registration of tacho data. Remote tacho download ensure correct acquisition of data. Efficient as both driver and truck data are retrieved remotely.

Truck monitoring

Live tracking will facilitate planning, provide documentation, and enable the creation of reports. Collect truck data to optimize utilization and predict maintenance. Monitor fuel consumption.

Transport of high value goods

Combine Lommy Pro with a door lock and possibly a camera and monitor the transport of valuable goods. Collect data as documentation for safe transport.

Cold chain transport

Register temperature fluctuations for safe and secure transportation of temperature-sensitive products. Collect reefer data to serve as documentation for correct handling. Easy to integrate with a multitude of reefer systems.

Trailer monitoring

Live monitoring of trailers in transport facilitates planning. Document correct transport and timely delivery. Create run reports to evaluate capacity. Monitor trailer data such as trailer load and EBS data for trailer utilization and maintenance planning.

Complete control and overview of your vehicles, trailers, and other belongings

Lommy Pro is designed to serve many purposes, e.g., fleet management and theft protection. In addition, optional equipment can be used in combination with Lommy Pro – for even more application possibilities. The device can be installed in any location where power supply is at hand.

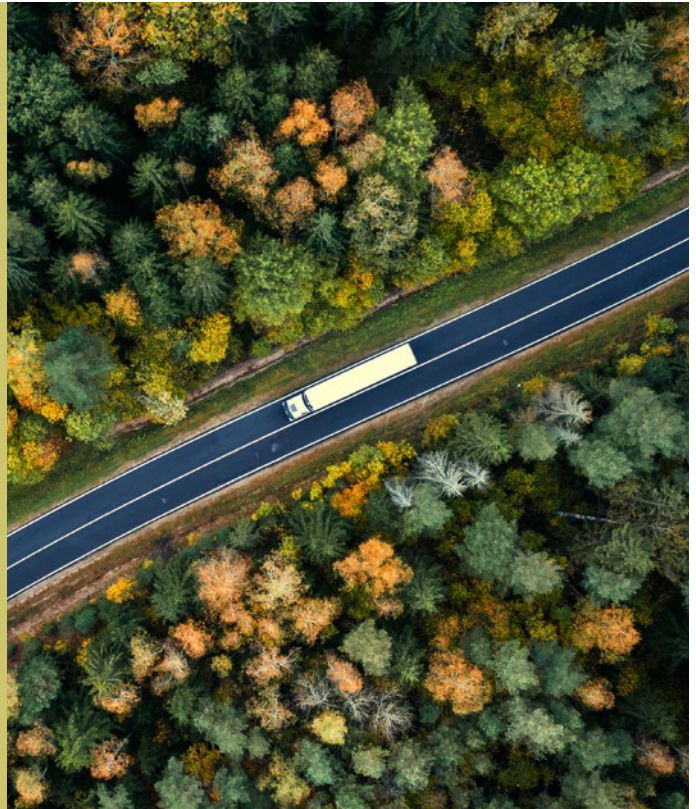

Key features:

- Small size, big performance
- Cost effective
- Can be used for several purposes – simultaneously
- Reliable and accurate positioning
- Secure data collection
- Flexible options for API integration

Possibilities:

- Fleet Management
- Truck Management
- Trailer Management
- Driver behavior insight
- Remote tacho download
- Temperature surveillance
- Securing high value goods
- Access registration
- Recovery, if lost
- Remote management of settings and alerts

Monitor your assets on various platforms – 24/7

Use our monitoring system or your own system to keep track of your entire fleet via phone, tablet or computer.

LommyFleet

Complete fleet management platform incl. real-time map with historical trails, custom alarms, geofence, report generator and maintenance planning.

White Label

Customised, branded platform, based on our systems.

System integration (API)

Use your own system. We will provide open source software and API.
